### Definitions

**Serious Fraud:** Serious fraud is a fraud that has significant impact on society or significant financial loss in total. However, the totality of the loss is not the sole determining factor for acceptance of investigative carriage. Mechanisms for committing fraud can incorporate corruption, collusion, multiple jurisdictions and/or elements of organized crime. Consequences of fraud have serious impacts on victims and erode public confidence in democratic processes, government integrity, and financial sector stability. Consideration must be given to an agency's capacity to investigate a serious fraud complaint.

**Fraud:** The wrongful or criminal deception intended to result in financial or personal gain.

**Financial Crime:** The unlawful conversion of the ownership of property for personal use and/or benefit. Examples of financial crimes include but are not limited to: fraud, theft, bribery, embezzlement, stock market manipulation, and money laundering the proceeds of crime.
